MORE CHERRPUL FRELING THE COPPER FIELD.

Again Rangioping Large Perces Cripple Creek Field Being Extended

Bush to Alaska a Record-Breaker.

Busts, Mon., March 16.—The mines are running again with about the same force that was employed before the general shutdown last fall. The Anaconda company is again shipping about 5,000 tons of ore daily to the smelters at Anaconda and the old smelter is being operated to its full capacity, while about one-half of the new works is being used. It is understood that as soon as the new smelter has been fully broken in the old smelter will be shut down. About 1,200 men are now employed at the new works and the number will be increased as the capacity of the smelter for handling ore is increased. The mines of the Boston and Montana company and Butte and Boston are also being worked again up to their normal capacities.

are also being worked again up to meir normal capacities.

The old silver emalter of the American Smelting and Refining Company at Great Falls is to be started up again, although when it was shut down aboust a year ago it was the intention to absenden and dismantle the plant. It will be practically rebuilt and operated exclusively on custom ore.

A full force of men is employed at the Heinze properties and by the Colorado and Parrot companies, and altogether the mining outlook has much improved during the past few weeks.

few weeks.

The development work in the new district east of Butte continues, but no big strikes have yet been made. The Butte Mine Development Company, which is developing the Pacific mine, is still engaged in crosscutting north and south from the 400-foot level. Some remarkably rich streaks of copper have been cut, but no large body of ore. At present the north cross-cut is in a "fault" composed of granite and feldspar and hard as fiint. A great amount of water as flint. A great amount of water also been encountered again and work leveral weeks has been very slow. It confident opinion of mining men, however, that the vein will be out within the next fifty feet. It is surmised that the big "fault" pushed the vein northward further than

The Butte Mining and Development Company is making rapid progress in developing the Emma mine. The shaft is now going down at the rate of about three feet a day, and it will be sunk to the 1,000-foot level before an attempt will be made to cross-cut to the vein. The Eastern stockholders, as well as the promoters of the enterprise, have shown their confidence in the Emma by putting up \$60,000 more to continue the development. It is expected that that sum will be sufficient to thoroughly demonstrate whether the Emma is a mine or not.

F. A. Heinze has just added another good property to his mining possessions in Butte by taking a lease and bond on the Miners' Union mine, which adjoins the Cora, recently purchased and developed into a big mine. The Miners' Union will be worked through the Cora and it will not require the expenditure of a large sum of money to

nditure of a large sum of money to onstrate the value of the property. The demonstrate the value of the property. The bond is for \$150,000 and the lease runs for one year. The Cora vein runs through the Miners' Union and there is no doubt that Mr. Heinse will take up the bond when it falls due. His mining partner, John MacGinnisa, has also purchased the Homestake mine in Park canon, east of Butte, for \$30,000, or rather the interest of the Basin and Bay State Mining Company in it. Mr. Heinse has been doing some development work on the Homeetake and undoubtedly knows its value as a mining

property.

The Montana Mineral Land Development Company, which is operating the Eva May and other mines in the Cataract district, has made an assignment to George B. Drakenfield, and an effort will be made to compromise with the Eastern creditors of the company and resume operations on the mines.

The Eva May has produced considerable d in its time, but during the last time its operation the gold ore pinched out and the mine developed into a copper property. The ore was not of sufficient value to pay the operating expenses. The com-pany has an indebtedness of about \$55,000, represented chiefly by claims bought up by George R. Best of Milwaukee.

sed that a company has been

DULUER, Minn. March is All the ore-carrying roads running from mines to lake Superior and lake Michigan are getting ready for the season and expect to com-mence hauling one in less than thirty days. This will be an earlier opening of navigation than usual fully a model earlier that large

mines on the Resch and brequeste reases that will probably make it independent of the Steel Corporation in raw material, it has just finished unwatering to the fifth level the Volunteer in se of the Marquette and this week commenced hoisting ore there. The Volunteer is a large deposit of lean ores that is owned by ex-Secretary of War Algorand is being operated by the Union Steel Company under a long lease with option for purchase. The same company has taken another mine on the Marquette range and will unwater it at once.

It is said that within a year 2,000 additional miners will be working steadily in the city limits of Negaunee. Marquette range. The United States Steel Corporation has the Negaunee mine there, and has bought much land on the formation; the Cleveland Cliffs Company is sinking a shaft for a large mine to be called the Maas, where it will work at least 1,000 men as soon as room can be found for them, and at the Hartford the shaft is now down to the ore and more than 500 men will be employed there as soon as they can be put to work. At this mine the ore was located 500 feet underground by diamond drill borings and was so accurately tested at that depth that the company felt safe in sinking a large and permanent shaft at a cost of more than \$100,000. But for a scientific use of the diamond drill this ore never could have been found. It is not impossible that such finds may be made elsewhere on this range and the life of the region extended many years.

Having been defeated in his attempt to fight the Northern Securities Company, the Governor of Minnesota is to begin suit against the Duluth, Missabe and Northern road, together with the United States Steel Corporation, on the ground of illegal combination. It is true that the stock of these roads, both Minnesota corporations, is held by the Steel Corporation, but they are managed independently and spart, and in every way as they were when one was owned by the Federal Steel Company, and the other by John D. Rockefeller. The two roads will pay to the S

CALIFORNIA.

will be paid in freights to lake shipping concerns.

CALIFORNIA.

SAN FRANCISCO, March 10.—One of the most promising mines on the rich Mother lode is the illinois, near San Andreas, which is largely owned by Sheriff Benjamin K. Thorne of Calaveras county. The surface rock was so rich in free gold that four Germans in early days made a fortune pounding it out with a hand morter, the ore yielding it out with a hand morter, the ore yielding it to the pound. As the shaft is sunk the vein shows up well and it is estimated that the ore will average \$5 a ton, which will well repay working. The Gwin mine, which was recepened by F. F. Thomas after lying idle for twenty years, is a similar low-grade ore proposition, but with over 200 stamps working it is paying regularly \$10,000 a month dividends, with ore enough in sight to continue this revenue for years. With fuel oil and electricity ore that averages only \$8 a ton can now be worked with profit.

The richness of the ore in the Virginia Dale district in southern California was only appreciated recently when rain washed off the dust and débris from a dump of ore and showed gold scattered all through it, an assayer obtained \$100 in gold from each of five crucibles of ore from the Virginia Dale mine. Experts believe this is really a pocket, instead of a rich ledge, and that it will not continue. In other mines the gold appears to be located in kidneys or pockets and one curious fact is that iron ledges are found alongside these gold deposite. The Texas mine near Redding, Shasta county, has developed a ledge fourteen feet wide that shows high-grade ore. Sixty tons per day will be shipped to the smelter at Keswick. The heavy rains have washed out many nuggets in the hills near Redding, several being picked up that range from \$5 to \$10 in value. Most of these nuggets come from placer or quarts deposite that have not yet been found by the prospector, and the number proves that there is much gold in Shasta county has just finished an inspection of

in Shasta county left for the lucky prospector.

Prof. Bailey of the State Mineralogical
Bureau has just finished an inspection of
Death Valley and reports that the salt deposits of this forbidding region are worth
several million dollars. The valley was once
the bottom of an inland sea like the Mojave
and Colorado deserts, and the salt deposited
is said to be finer and in larger quantity
than at Salton, in the heart of the Colorado.
Many tracts of salt land have recently been
taken up. All that is needed to make them
valuable is some means of cheap transportation to the railroad.

NEVADA. NEVADA.

RENO, March 11.—A good many wildcat Tonopah mining schemes are being advertised at the East and the extraordinary richness of the Mizpah ledge and the fortunes which the lessers secured from it are being used to float these games.

The Tonopah Mining Company, which succeeded to nearly all the paying mines

Creek a great camp. Since the companies have been alow to lease their valuable properties, preferring to work them. Development has been thus retarded and hundreds of miners were left without his continued of miners were left without his continued of miners were left without his camp. The exception to the rule found in the Cripple Creek Bonanza King. W. B. Stratton. He owns about one-tenth of the producing area of the camp. He persists in working his extensive system of mines on his own account. His results are not indifferent, as he is paying 500 to 600 man besides installing expensive equipments over various shafts all capable of hoisting from 2,000 feet depth. This outlay is met by production alone. Stratton began his work eighteen months ago. Most of the mines were unproductive. He has expended close to \$1,500,000 in development work and equipments on properties that cost him \$7,000,000 cash. He is testing the theory that Cripple Creek is a deep mining camp. He has extracted possibly \$2,000,000 from his mines; but his method, as in the case of his Independence mine, is to make rather than gut mines. He has uncovered considerable ore bodies to be knocked down and hoisted later. Much interest centres in his experiment. If will be in fact, a new era, showing, as it evidently will, that there is a second Cripple Creek under the one whose shallow workings thus far have yielded in excess of \$115,000,000.

Capt. J. J. Ducey and J. Caffrey of Victor and Brown & Weir of Cripple Creek have received a dataless warning against renting or leasing their properties to buyers of stoleng over the horse were located at Cripple Creek, Victor and Goldfield, several miles spart. They were blown up simultaneously, doubtless the work of several men representing an organized body.

The convection of Keroh Kuykendall and company, whose loss from ore stolen by an organized body.

The convection of Keroh Kuykendall and Terminal and 120 over the Device was also accounted its present schedule three months ago the warresuled. The end is

INTER BLACK RILLS.

DEADWOOD, S. D., March ii.—The new cyanide plant of the Imperial Mining Company in Deadwood has been started up on ore from the Blacktail mines of the company, treating 100 tons a day. The plant has machinery capable of crushing 200 tons a day and the tanks will handle 100 tons.

The Pluma Mining Company has purchased the hoisting machinery that has been in use at the Eureka shaft of the Galena Mining and Smelting Company in Strawberry Guloh, near Galena, and is having it moved to the Pluma shaft, on ground joining the Homestake on the east.

The Horseshoe Mining Company has been reorganized under the laws of Wyoming, with the principal office in Milwaukee, Wis. UTAH.

UTAH.

SALT LARE, March 10.—Under an option requiring the payment of \$175,000 within the next six months possession of the Sioux and Utah groups of mines at Tintic has just passed into the hands of J. A. Underwood, the Causa Mining Company superintendent.

As a result of an examination of the oil products in Carbon, Emery, San Pete and Sevier counties by S. MacEachen, representing the New York and Utah Oil Company, a great amount of New York capital will be invested in the Utah oil fields during the coming spring. IDAHO.

ALASKA.

cluding dry goods, at the port of New York, into week, were \$11,041,660 against \$12,817,516 the previous week, and \$10,317,926 for the corresponding week of last year. The imports of specie for the week were \$271,187, of which \$270,000 was gold, making total specie imports since Jan. 1, \$1,066,208. Exports of specie were Gold, \$47,208, silver, \$783,074, a total of \$510,380, against \$2,307,654 the previous week. The exports of specie since Jan. 1 have been; Gold, \$13,785,220; and silver, \$3,59,601, a total of \$22,124,011.

The official count of the cash in the Treasury to-day, not including the gold reserve of \$150,000,000 and \$819,479,089 in gold, silver and notes against which certificates are outstanding, and compared with that of last Saturday shows:

STEPHEN M. WELD & CO.
Dissolution of Partnership.
The firm of Stephen M. Weld & Co., with offices at 60 State Street, Boston, Mass., and 22 William Street, New York City, is this day dissolved by mutual consent, Charles W. Ide retiring on account of ill health.
The partners, Stephen M. Weld, Affred R. Weld and Edward M. Weld, are severally authorized to sign in liquidation.
The business will be continued by a new limited partnership under the same name, notice of which follows:

partnership under the same name, notice provis-follows:

The new partnership is formed under the provis-ions of the Revised Laws of Massachusetts (1802), and will continue business in the old offices.

Stephen M. Weld & Co.

ions of the Revised Laws of Massachusetts (1902), and will continue business in the old offices.

Stephen M. Weld of Company.

Special Partnership Certificate.

The undersigned, Stephen M. Weld of Dedham, Alfred R. Weld of and Dedham, Edward M. Weld of Westwood. Walter Hunnewell of Wellesier, Francis L. Maraspin of Malden, Harry S. Thompson of Melrose, all in Massachusetts, do hereby certify that we have this day formed a limited partnership, under the provisions of Chapter 71, Revised Laws of Massachusetts, 1902, under the firm name Stephen M. Weld & Company, the use of which name has been consented to by the members of a former firm of the same name, to the business of which the limited partnership above mentioned lawfully succeeds.

The residences of the partners are as above mentioned and of the partners undersigned said Stephen M. Weld are general partners, and said Walter Hunnewell has contributed to the common stock the sum of one hundred thousand dollars (\$100,000). Said Francis I. Maraspin has contributed to the common stock the sum of one hundred thousand dollars (\$100,000), and the said Harry S. Thompson has contributed to the common stock the sum of fifty thousand dollars (\$50,000). The general nature of the business to be transacted is that of buying, selling or in any manner dealing in cotton in any form, or acting as brokers, factors or agents in connection with the purchase or sale of cotton in any form, or acting as brokers, factors or agents in connection with the purchase or sale of cotton in any form, or acting as brokers, factors or agents in connection with the purchase or sale of cotton in any form, or acting as brokers, factors or agents in connection with the purchase or sale of cotton in any form, or acting as brokers, factors or agents in connection with the purchase or sale of cotton in any form, or acting as brokers, factors or agents in connection with the purchase or sale of cotton in any form, or acting as brokers, factors or agents in connection with the purchase or sale of cott

COMMONWEALTH OF MASSACHUSETTS.
Suffolk, sa:
Boston, February 12th, 1902.
Then personally appeared before me the said
Stephen M. Weid, Waiter Hunnewell, Francis L.
Maraspin and Harry S. Thompson, being four of
the six partners, general and special, mentioned in
and who signed the foregoing certificate of limited
partnership, and severally acknowledged that they
executed the same as their free and voluntary
act and deed, for the uses and purposes therein
set forth.
Before me,
Notary Public and Justice of the Peace.

PREPERRED CAPITAL STOCK DIVIDEND NO. 6.
At a meeting of the Board of Directors of The American Agricultural Chemical Company, held this day, B was resolved that a semi-annual dividend of Three Fer Cont (3%) on the Preferred Capital Stock he declared and path on April 1st next to Stockholders of record on March 17, 1802.

The transfer books of both Preferred and Common stock will be closed on March 17, 1802, and reopened on April 1, 1802.

W. H. GRAFFLIN, Treasurer.

TITLES IN MAMARONECK VOID

PROPERTY OF SEVERAL HUNDRED PERSONS INVOLVED. Innocent Purchasers May Have to Suf-

fer Loss Because Some One Made

a Careless Search."

[In this case, a mortgage covering a large plot was foreclosed, and the fact that a portion of the land had been released was overlooked. The defendants in the actions decided bought their lots at the foreclosure sale under the impression that they got good title by the referee's deed, and made improvements upon them in this belief. The plaintiff's rights to so much of the mortgaged premises as had been released were unaffected by the foreclosure suit, and he was awarded the premises. The property in dispute is situated in the heart of the Village of Mamaroneck, and hundreds of persons are directly or indirectly interested in the suits.]

If this company had insured the title,

FIRST-It would have conducted, at its own expense, the costly litigation involved.

SECOND-It would, if defeated, have made good the loss of the property to the insured.
